

Ampro systems, inc. was founded in March 1997 as a full service electronic contract manufacturing company to the OEM market segment. Driven by the desire to deliver the highest possible quality service, Ampro became **ISO 9001:2008 certified.**

Ampro provides the superior quality service to customers by offering custom manufacturing solutions; turnkey material purchasing, product design review, system build, testing, and quality services. We look forward to working with your engineering and manufacturing teams; from product design through the entire product life cycle and beyond.

We are committed to use the most advanced technologies, state of the art equipments, and professional staffs to build a world class organization on the basis of efficiency, quality and customer satisfaction.

Procurement Service

Our experienced procurement department can locate material vendors and negotiate the best prices for you. Part of our turnkey solutions includes acquiring all that is needed to create your product from chips to packaging.

We are strategically aligned with multiple material vendors in the U.S. and overseas. This leverages our buying power to secure the lowest prices on the highest quality of lead and lead-free (RoHS) products and pass the savings on to our customers.
